CARDIO-301 Consent Elements Verification Template

Use this starter file to verify that the site has the correct approved consent materials and that required consent elements can be located. The first two rows are completed as model examples; complete the remaining rows by cross-referencing the provided Sample Consent Form.

Site Name:	North Valley Clinical Research Center	**Site Number:**	301-017
ICF Version/Date:	Version 1.0 / 05-Jan-2026	**IRB Approval Date:**	09-Jan-2026
Reviewed By:	[Your name], Clinical Research Coordinator	**Review Date:**	10-Nov-2026
Language:	English	**SIV Date:**	17-Nov-2026

Consent Element Verification

Consent Element	Present?	Location (Section/Page)	Verified Against	Status/Notes
Statement that the study involves research	Yes	Section 1, page 1	CARDIO-301 Sample Consent Form, Version 1.0/15-Oct-2023	MODEL: The Introduction and Purpose section explicitly states that participation is in a research study.
Purpose of the research	Yes	Section 1, page 1	CARDIO-301 Sample Consent Form, Version 1.0/15-Oct-2023	MODEL: The consent states that the purpose is to evaluate an investigational study medication in adults with hypertension and its effects on blood pressure.
Expected duration of participation	Yes	Duration and Number of Participants, page 1	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Complete. States participation lasts approximately 24 weeks, not including screening and

				follow-up.
Description of study procedures and identification of experimental procedures	Yes	Study Procedures, page 1	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Complete. Lists history/medication review, exams, blood pressure, ECGs, blood and urine collection, questionnaires and visits; identifies CARDIO-301 as investigational and explains randomization, placebo and blinding.
Reasonably foreseeable risks or discomforts	Yes	Risks and Discomforts, page 1	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Complete. Lists dizziness, headache, low blood pressure, fatigue, nausea, blood-draw discomfort/bruising and currently unknown risks.
Reasonably expected benefits, if any	Yes	Potential Benefits, page 1	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Complete. States the participant may or may not benefit directly and that the information may help future patients.
Appropriate alternatives to participation, if applicable	Yes	Alternatives, page 2	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Complete. States participation is not required to receive care; lists standard medications, lifestyle changes and other treatments.
Confidentiality of	Yes	Confidentiality,	CARDIO301 Informed Consent	Complete. States records are kept

records		page 2	Form, Site 301-017, Version 1.0/05-Jan-2026	confidential as permitted by law and may be reviewed by the sponsor, site, IRB and regulatory authorities.
Compensation/ treatment information for research-related injury, when applicable	Not Present	Research-Related Injury, page 2 (incomplete)	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Incomplete. The section only says injury information 'will be explained before enrollment'. To add: whether medical treatment and compensation are available, what they consist of, who pays, and where to get further information.
Contact information for study questions, participant rights, and research-related injury	Not Present	Contacts, page 2 (incomplete)	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Incomplete. The section refers to 'contact information provided by the site' but gives no names or numbers. To add: PI/study team name and 24-hour phone number for questions and injuries, and the IRB name and phone number for rights questions.
Statement that participation is voluntary and refusal/withdrawal will not result in penalty or loss of entitled benefits	Yes	Voluntary Participation, page 1	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Complete. States participation is voluntary and that refusing or stopping will not result in a penalty or loss of entitled benefits.

Any additional elements required for this study or by the reviewing IRB	Not Present	Partly covered: Risks and Discomforts, page 1; Duration and Number of Participants, page 1; Costs and Compensation and New Information and Early Withdrawal, page 2	CARDIO301 Informed Consent Form, Site 301-017, Version 1.0/05-Jan-2026	Incomplete. Present: unforeseeable risks, number of participants (about 600), new findings, termination by investigator/sponsor. To add: ClinicalTrials.gov registration statement, consequences and procedures for withdrawal, specific participant costs/payments, and HIPAA authorization language if no separate form is used.

Final Verification: ☐ Ready for SIV review ☒ Follow-up required

Reviewer Notes:

1. The ICF header (Site 301-017, Version 1.0, January 5, 2026) matches the version approved in the IRB letter dated January 9, 2026.

2. Follow-up required on three rows: research-related injury, contact information, and additional elements. Revised wording must be submitted to and approved by the IRB as a new ICF version before any participant is consented.

3. The two MODEL rows cite 'Section 1' and 'Version 1.0/15-Oct-2023'. In the consent form provided, that content is in the unnumbered 'Invitation and Purpose' section, page 1, and the form is dated January 5, 2026. Locations in my rows use the section headings and dates as they appear in the provided form.

4. The ICF title describes Stage 2 hypertension; confirm with the monitor that this matches the sponsor protocol for CARDIO-OUTCOMES 301.

File Management Plan

1. Write the names of the four files you are going to submit in this project. Follow the naming convention and give proper version control. File names must follow the required naming convention: **\ [StudyID]_[DocumentType\]_\[Version]_[YYYYMMDD\].**

Your Response:

1. CARDIO301_Regulatory_Compliance_Checklist_v1.0_20261110.xlsx

2. CARDIO301_IRB_Document_Inventory_v1.0_20261110.xlsx

3. CARDIO301_Clinical_Documentation_Form_v1.0_20261110.docx

4. CARDIO301_Consent_Elements_Verification_v1.0_20261110.docx

Version control: All four files are version v1.0 (first final version for SIV review) and dated 20261110, the date they were finalized. Drafts are numbered v0.1, v0.2; a minor correction after review becomes v1.1 and a major revision becomes v2.0, each with a new date. Only the current version stays in the package; superseded versions are moved out to an archive so the monitor never sees duplicates.

2. Create a primary folder and within it, create sub-folders for different categories. Write the primary folder name and sub-folder names. For each sub-folder, explain in one sentence what type of document/s you will upload in that sub-folder.

Your Response:

Primary folder: CARDIO-OUTCOMES 301—Site Readiness Package

01_Regulatory Compliance: the completed Regulatory Compliance Checklist (CARDIO301_Regulatory_Compliance_Checklist_v1.0_20261110) with supporting regulatory documents and a copy of the delegation log.

02_IRB Documents: the completed IRB Document Inventory (CARDIO301_IRB_Document_Inventory_v1.0_20261110) with the IRB approval letter, current protocol, approved recruitment and participant-facing materials, and IRB correspondence.

03_Clinical Documentation: the completed Clinical Documentation Form (CARDIO301_Clinical_Documentation_Form_v1.0_20261110) with approved source templates, worksheets and visit documentation tools.

04_Informed Consent: the completed Consent Elements Verification (CARDIO301_Consent_Elements_Verification_v1.0_20261110) with the current IRB-approved consent form and any translated consents if applicable.

05_SIV Readiness: the SIV agenda, the outstanding action list (open Pending items and consent follow-ups), training completion evidence and readiness notes.
